

# HABITAT INVESTIGATION

What types of habitat do you have at your school? Walk around your school grounds to investigate different habitat features. *Make sure you have permission from your teacher first.*

Photo of habitat features	Tick any areas of your school that provide similar habitat.	Describe the features in your school that provide similar habitat and predict what types of animals may live or use the area.	Could you create this habitat feature in your school? Yes or No
	<p>Large trees with hollows for gliders, other marsupials and birds to nest in</p>		
	<p>Native grasslands for moths, birds, insects, reptiles and small mammals</p>		
	<p>Earth embankments for pardalotes</p>		
	<p>Grassy bogs for frogs</p>		

	<p>Woodland with trees and open forest floor for foraging phascogales</p>		
	<p>Tussock grass in open woodland for lizards and other reptiles</p>		
	<p>Stumps with crevices and loose bark for bats</p>		
	<p>Dams or ponds with a sloping shore and rocks or logs for turtles</p>		
<p>Do you have any other types of habitat at your school?</p>
